PROFESSIONAL SUMMARY

Frontend Developer with 2+ years of experience building modern, responsive, and user-friendly web applications using React.js. Proficient in creating scalable components, managing state efficiently, and optimizing application performance. Experienced in working with REST APIs, handling UI/UX requirements, and delivering clean, maintainable code. Comfortable collaborating with cross-functional teams in Agile environments, with strong problem-solving and communication skills.

SKILLS & TOOLS

- Core Technologies: React.js, JavaScript (ES6+), TypeScript
- UI & Styling: Tailwind CSS, Bootstrap, SCSS, HTML5, CSS3
- State Management: React Hooks, Context API, Redux Toolkit
- Version Control: Git, GitHub
- Tools & Collaboration: Slack, ClickUp, Figma, Postman, VS Code
- Practices: Code Reviews, Component Reusability
- Cloud Platforms (Basic Exposure): Firebase, Netlify, Vercel

WORK EXPERIENCE

Emaad Infotech— React Developer

March 2024 – Present

- Implemented unit testing for React components and hooks using Jest and React Testing Library to ensure application reliability and maintain high test coverage.
- Optimized application performance through code splitting, memoization, lazy loading, and efficient state management.
- Built and centralized reusable components and custom hooks to improve consistency, reduce duplication, and accelerate development across modules.
- Conducted code reviews leveraging AI tools alongside manual validation to maintain high coding standards and best practices.
- Integrated third-party APIs and payment gateways (e.g., Stripe) to handle secure payment flows and dynamic data rendering.
- Managed version control and collaboration using Git and GitHub, ensuring smooth development workflows and proper code versioning.

- Performed cross-browser testing to ensure consistent behavior and UI/UX across different environments and devices.
- Maintained clear and structured technical documentation to support team collaboration and long-term project scalability.

KEY PROJECTS :-

1. Guizye-Israel-New (Quiz Web Application)

- Developed interactive quiz UI with timer-based questions and real-time score tracking.
- Built responsive frontend using React.js and Bootstrap.
- Implemented form validation using Zod and React Hook Form.
- Managed application state using LocalStorage for user progress and leaderboard.
- Optimized UI performance and ensured smooth user experience.

2. Astro-IQ-React (Astrology Web Application)

- Developed full-stack astrology platform with personalized horoscope predictions.
- Built REST APIs using Node.js and Express.js for backend functionality integrated.
- Implemented daily, weekly, and monthly horoscope features.
- Designed responsive UI and improved user interaction using.
- Managed user data and optimized application performance in React.js-based system

3. Gharda-New (Admin Panel / Dashboard)

- Developed frontend modules such as Location and Department management.
- Created dynamic forms, listings, and status update UI.
- Integrated APIs for seamless data communication with backend.
- Improved UI consistency and enhanced user experience.

Xipra Technology — Frontend Developer (intern)

April 2023 – March 2024

- Gained hands-on experience in React.js by developing reusable components and understanding component-based architecture.
- Assisted in building and optimizing user interfaces with a focus on responsiveness and performance.
- Integrated REST APIs and worked with dynamic data rendering in React applications.
- Collaborated with senior developers to understand real-world development workflows, debugging, and best practices.
- Participated in code reviews and improved code quality by following clean coding standards.

EDUCATION :-

Bachelor of Computer Applications

D L Patel Institute of Management & Technology, Himmatnagar
2022 – 2025

Higher Secondary School Certificate (HSC)

Padhiar High School, Himatnagar
2021 – Jun 2022

Secondary School Certificate (SSC)

Padhiar High School, Himatnagar
2019 – 2020

ADDITIONAL HIGHLIGHTS

- Proven experience working in Agile environments, collaborating effectively with cross-functional teams.
- Skilled in translating UI/UX designs (Figma) into responsive and interactive React.js applications.
- Strong understanding of component-based architecture and modern React best practices.
- Basic working knowledge of Node.js, Express.js, and MongoDB, enabling effective communication and collaboration with backend teams.
- Experience in integrating REST APIs and understanding end-to-end data flow between frontend and backend systems.
- Focused on writing clean, maintainable, and scalable code with reusable components and hooks.
- Quick learner with a proactive approach to problem-solving and continuous improvement.
